## New Enclosed Cabinet

No. 46 (Closed)

**T**HIS Cabinet is a beautiful article of furniture handsomely finished, and when closed presents no suggestion of a Sewing Machine.

The entire front of the cabinet is hinged and, when opened to the left, ample room is afforded the user for working the machine. The door is provided on the inside with a fitted tray and commodious drawer, the former for holding thread, scissors, and accessories, the latter for unfinished work, etc. When not in use the machine is lowered beneath the table top.

## New Enclosed Cabinet

No. 46 (Open)

**T**HE following machines can be supplied on this style of cabinet work :—

- 127K Vibrating Shuttle with Long Bobbin.
- 15K Vertical Oscillating Hook with large Central Bobbin.
- 66K Horizontal Oscillating Hook with large Stationary Bobbin.

“

*For Prices see page 6 of supplement*

## Cabinet Table (Drop-Head)

on Stand with Wooden Sides, in  
Brown Mission, Golden Oak or  
Walnut

**T**HIS new stand with wooden sides is designed to harmonise with the Singer Cabinet Table.

When not in use the Machine can be lowered beneath the top of the table and the extension leaf folded over.

The following machines can be supplied on this style of cabinet work :—

- 127K Vibrating Shuttle with Long Bobbin.
- 15K Vertical Oscillating Hook with large Central Bobbin.
- 66K Horizontal Oscillating Hook with large Stationary Bobbin.

These tables can also be supplied with 3 or 7 drawers, if preferred.

*For Prices see page 2 of supplement*

## One-Drawer Drop-Leaf Table with Cover

**S**INGER Machines on this type of cabinet work form a prominent feature in thousands of homes. Their enduring qualities are in every way worthy of the famous Singer reputation.

Singer construction is not for a year or two years, but for a lifetime's easy and economical sewing.

The following machines can be supplied on this style of cabinet work :—

- 127K Vibrating Shuttle with Long Bobbin.
- 15K Vertical Oscillating Hook with large Central Bobbin.
- 66K Horizontal Oscillating Hook with large Stationary Bobbin.

*For Prices see page 3 of supplement*

## Singer 99K Hand Machine

**T**HIS is the lightest Lock-stitch Hand Machine, gracefully designed, silent and easy running, and will give a life-time's good service on all kinds of domestic sewing.

The small detachable Extension Leaf greatly assists the operator in handling material while stitching.

Have one on **FREE TRIAL**—or if you prefer, on **RENTAL** for a short period.

The following Hand Machines can also be supplied:—

- |      |   |   |
|------|---|---|
| 127K | } | Vibrating Shuttle with Long Bobbin.                       |
| 128K |   |   |
| 15K  |   | Vertical Oscillating Hook with large Central Bobbin.      |
| 66K  |   | Horizontal Oscillating Hook with large Stationary Bobbin. |

*For Prices see page 4 of supplement*

## Singer 15K, 66K and 99K Portable Electrics

99K All-Electric Machine.

**P**LACED on a table anywhere, it only requires to be connected to an electric lamp socket or wall plug to be ready for sewing.

Light pressure of the knee against a conveniently placed lever starts the machine—the pressure exercised controls the speed. There is no need to touch the wheel in starting or stopping—both hands are perfectly free to guide the work.

The Singerlight, a neat little lamp at the back of the machine, throws its light just where required and prevents eyestrain.

The small detachable Extension Leaf greatly assists the operator in handling material while stitching.

*For Prices see page 5 of supplement*

## The New No. 40 Table

with 66K Electric Complete

THE finishing touch of convenience is added to the 66K Electric when fitted on this beautiful table. With it the machine is operated in the utmost comfort, both hands being free to guide the work.

The local Singer Shop will gladly demonstrate this model to you without any obligation whatever, or it can be sent to your home for FREE TRIAL.

“

*For Prices see page 6 of supplement*

## The New No. 40 Table

(Closed)

WHEN closed, with the knee lever turned up out of sight, the New No. 40 is a most useful and artistic table.

Fold back the “leaves” of the table top, lift the head of the machine to its sewing position, plug into an electric lamp socket or wall point, and in a moment this elegant article of furniture is transformed into a highly efficient All-Electric Sewing Machine, as shown on the opposite page.

“

## HOW TO TRANSFORM YOUR SINGER INTO AN ELECTRIC MACHINE

Fit it with a Singer Motor and  
a Singerlight

Singer Electric Motor.

ONE screw fixes the motor to your machine. The motor is simplicity itself. Connect to a lamp socket or wall-plug and you are ready to sew by electricity.

The machine sews when light pressure is applied to the foot control and gains speed as pressure is increased. No need to touch the wheel; the machine always starts in the right direction.

Any Singer salesman will gladly demonstrate this motor in your own home on your own machine if you will call or write to the local Singer Shop.

For illustrations of Singerlight, see pages 7 and 8.

For Prices see page 6 of supplement

## Dressmaker's Machine

15K on One-Drawer Drop-Leaf  
Table and Cover

THE machine is fitted with oscillating shuttle mechanism, is very strong, and specially suited for dressmakers. As the treadle stand is fitted with a large band wheel, high speed is easily attained.

If desired, the machine can be fitted for electric drive, thus considerably increasing its efficiency.

For Prices see page 7 of supplement

## Tailor's Machine

31K15 on Ball-Bearing Stand

**T**HIS machine is fitted with a knee lever, and can be run at high speed. The end and back leaf table, with both leaves up, is 48 inches long and 25 inches wide, giving ample room for the work. Nos. 16K and 44K Machines can also be supplied on the same style of table.

Any of the above machines can be fitted with a motor for electric drive.

“

*For Prices see page 7 of supplement*

## Shoe-Repairer's Machine

29K53 for Shoe Repairing and  
General Leather Stitching

**H**AS side wheel and upper feed, which feeds the work in any direction. A spiral spring permits of easy adjustment of the pressure and lift of the feeding foot; the lower arm is 12 $\frac{1}{4}$ " in length.

The improved shuttle mechanism can be easily detached from the machine in the case of repair.

“

There is always a  
Singer Shop  
near you

- ❑ Should you remove from one town or country to another, there is a Singer shop always at hand where you can obtain free advice on any question regarding your machine, and for the ready purchase of needles, cottons, oil and replacement parts. The inconvenience of having your machine out of action for lengthy periods is thus avoided.
- ❑ Immediately you purchase a Singer Machine, the Singer Service is there to assist you. How different are the conditions when one purchases a so-called "cheap" machine, for which the vendor accepts no responsibility and for which it is almost impossible to get replacement parts.
- ❑ Nothing is better calculated to ensure efficiency and long life for your machine than frequent lubrication with the best sewing machine oil.—Singer Oil is a light, pure oil which really **does** lubricate. Cheap impure oils rapidly dry up and clog the mechanism.
- ❑ Get the best stitching results from your machine by using perfectly made needles. Inferior needles cause constant annoyance in missing of stitches and breaking thread, owing to the "eye" being faulty. Therefore, always buy Singer Needles, which are strong, dependable and well finished.
- ❑ Even in the finest sizes, Singer Cotton is strong and is entirely free from those knots and irregularities—found in inferior cotton—which do so much to spoil the neatness and charm of perfect stitching, and cause the needle to bend and break.
- ❑ Remember, if you desire your sewing machine cleaned—irrespective of make—send a postcard to the local Singer shop, when, for a moderate charge it will be collected, overhauled by experts and returned to you without undue delay.

You will be delighted with the dainty Sewing you can do with the aid of

Singer Attachments
